Article Nr. TL-6200

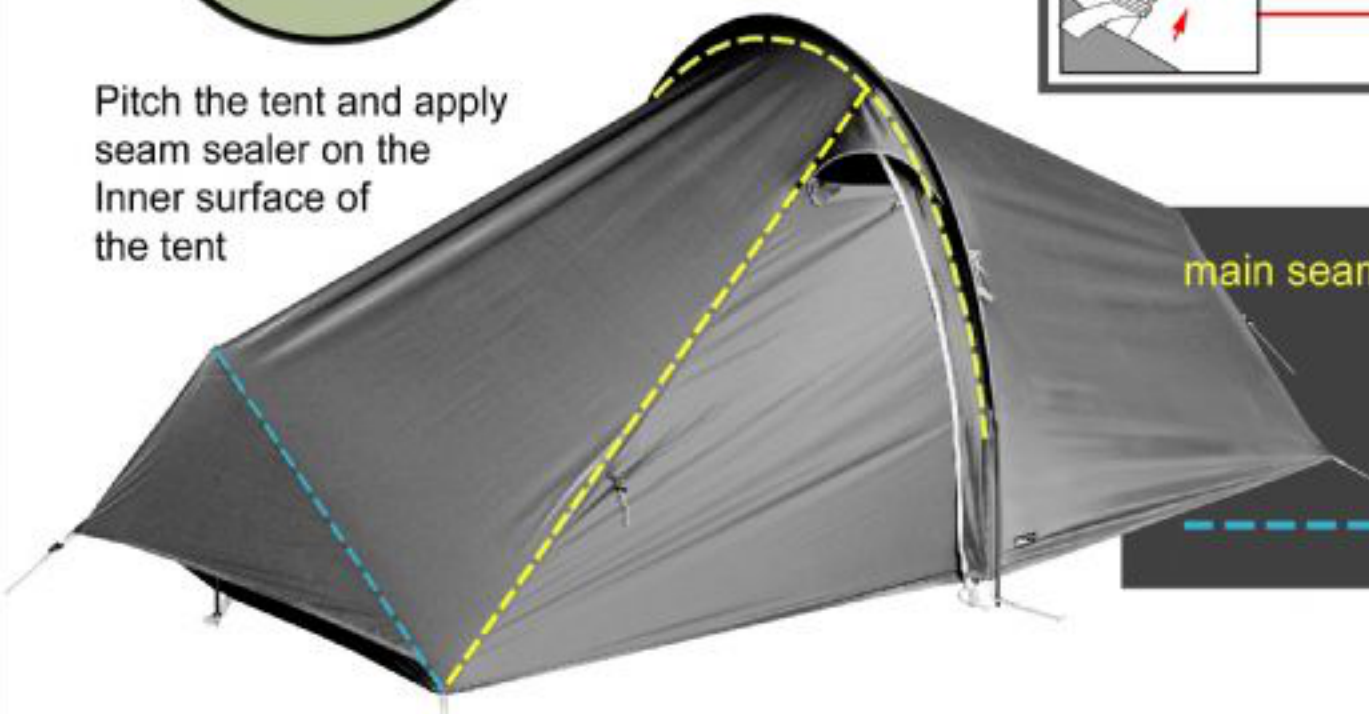

- Flysheet : 40D/ 260T nylon ripstop fabric with one side PU and one side siliconized
- Inner tent: High density nylon mesh
- Inner floor: 68D nylon taffeta PU 4000mm
- Pole : Yunan Alloy 7001 dia8.5/T6
- guyrope : Reflective type 2.2mm dia
- stake : 15cm alloy Y-type x 6 pcs
- Silicone seam glue : Included
- Net weight : +/- 1.58kgs
- Packed weight: +/- 1.70kgs

## Seam Sealing the tent

As the siliconed tents are designed without seam taping, we recommend users to apply seam sealing on inside seam of flysheet and certain points on inner tent corner in order to obtain better rainproof result if the tent will be subjected to prolonged rainfall or persistantly wet environment.

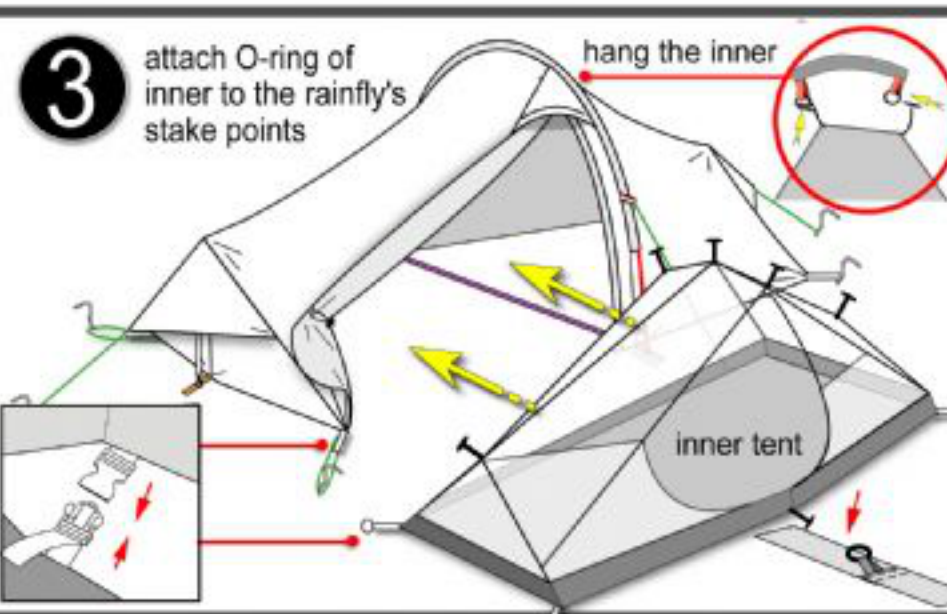

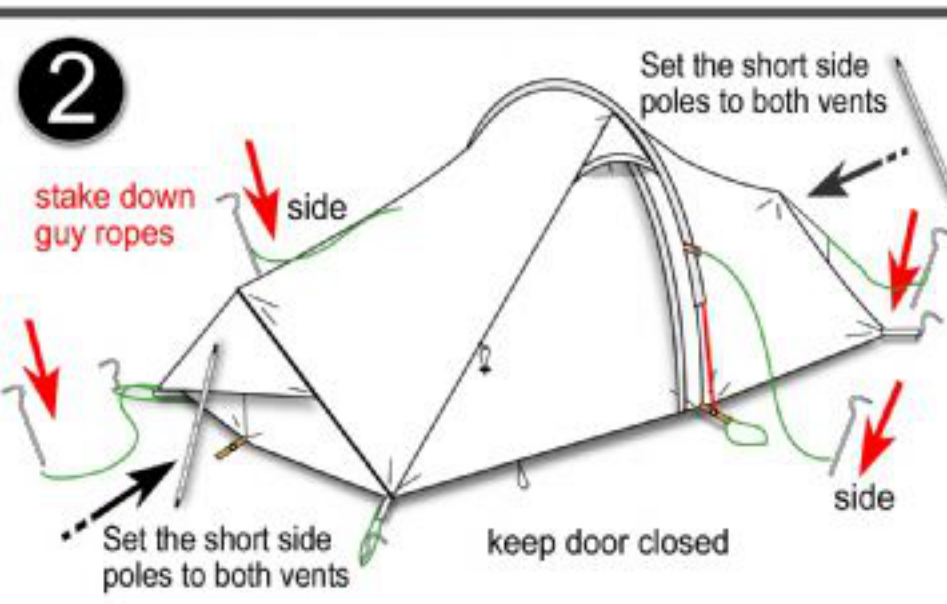

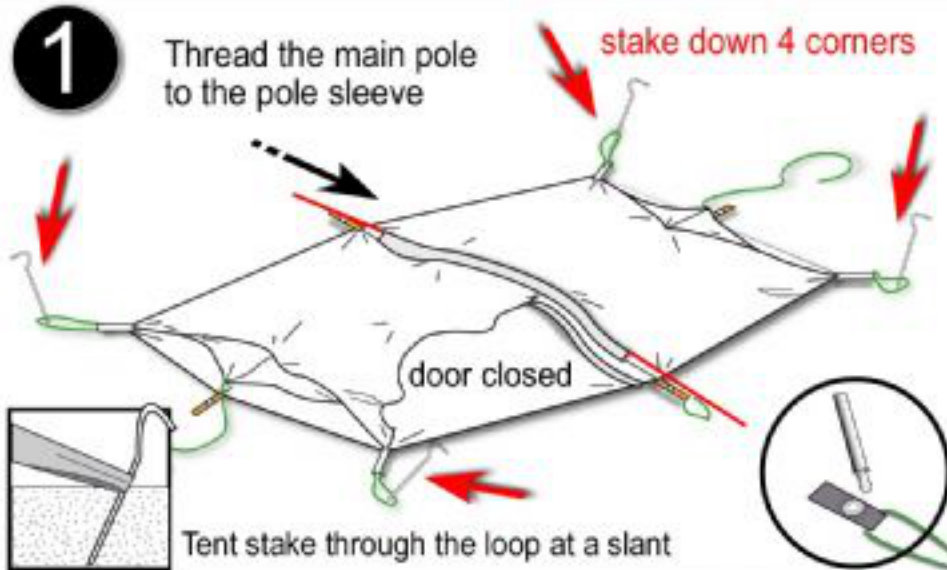

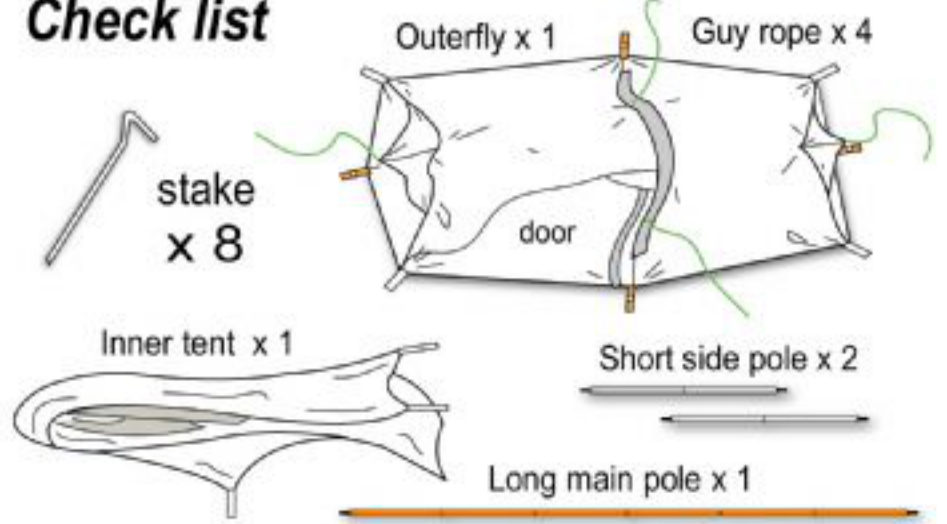

Pitch the tent and apply seam sealer on the inner surface of the tent

main seam to seal

minor seam to seal
